

A Limited Listing of Scientific Studies Concerning Handwriting since 1970
compiled by Sheila R. Lowe, CG

* Ben-Shakhar, May Bar-Hillel, Yoram Bllu, Edor Ben-Abba and Anat Flug - can graphology predict occupational success? Reports on two empirical studies for testing the validity of graphological predictions; Journal of Applied psychology, p. 645(9),Nov. 1986

Beumont, P. - Small handwriting in some patients with anorexia nervosa; British Journal of Psychiatry, 119, 349-350, 1971.

Boatwright, Deborah E., B.S. - Triazolam, Handwriting, and Amnestic States: Two Cases; Journal of Forensic Sciences, JFSCA. Vol. 32, No. 4, July 1987, pp. 1118-1124.

Broern, W. - Graphology and its importance in current medical psychology; Medizinische Klinik, Hamburg, 66, 6, 1971.

Dekay, ML - The effects of drawing method on the discriminability of characters, Visible Language, V0025 Nf: Fall, pp 376-414, 1991.

Ericsson, I. - Graphic skills as a diagnostic tool for working with the elderly; Visible Language, 24, 2, 214-226, 1990.

(Author unknown) Economist; CIA agents in the (former) USSR are asked to send any New Year's cards they receive to the US so that graphologists can check whether their acquaintances are suspicious. v315n7659, p. 97-98, June 16, 1990.

* Hartford, Huntington - You Are What You Write, cites several scientific studies Three Studies of Beginning strokes - the degree of maturity of a writer is compared with the retention or elimination of initial strokes. In all studies, students who retained the secondary beginning strokes were found to be passive and immature. A Study of the Small ' a'. 'd' . and 'f' . The copybook form and variants of these letters were correlated with education, IQ, and age. All variants were distinguished from eleven remaining variants by a high degree of motoric economy and radical and original departures from copybook model.

Handwriting Analysis in Cancer Detection. The author provides a brief resume of three important studies, which were part of a research project, "Condensed Resume of Neuromuscular test Research (Alfred Kanfer). Correct ratings were made for clinical cancer in 90-96% of 1536 cases. Similar results were accomplished in the other two studies (one controlled by American Cancer Society, the other at Strang Clinic). Effects of Alcohol The purpose of the study was to compare the graphomotor functioning of 68 alcoholics with 18 normals. The normals had a generally superior performance to the alcoholics. The normals wrote with less variability than the alcoholics

and were able to deliberately control pressure more easily than the alcoholics. Macmillan Publishing Co., 1973

* Hatfield, Iris, E. Edward Peeples, PhD, and Robert O'Block, PhD - Examining horizontal

lengths of signatures in true vs false statements; Human Graphics Center for Research and Information, 1994.

Hearns, R. - The use of graphology in criminology; *Criminal Psychopathology*, 3, 461-464, 1972.

* Heninger, Polly - Conditional Handedness: handedness changes in multiple personality disordered subject reflect shift in hemispheric dominance; *Consciousness and Cognition* 1, 1992.

* Hermann, Ned and Jeanette Farmer - The Theory of Contraction and Release in Handwriting as Related to Brain dominance; 1990.

* Iannetta, Kimon and Reed Hayes, James F. Craine, PhD & Dennis G. McLaughlin, PhD - Facilitating Assessment of Dangerousness by Using characteristics of Handwriting; Hawaii, 1992.

Keinan, G - Can stress be measured by handwriting analysis--The effectiveness of the analytic method; discusses theoretical implications and possible advantages of using handwriting parameters as an indication of acute stress. *Applied Psychology--An International Review--Psychologies Appliquee-Revue International: V0042 N2: APR 1993: pp. 153-170.*

Kopp, W., G. Paulson, J. Allen, D. Smeltzer, F. Brown & W. Kose - Parkinson's disease: L-dopa treatment and handwriting areas; *Current Therapeutic Research*, 12, 3, 115-124, 1970.

Kraus, Ron (various graphologists - Reliability and Validity of Handwriting Analysis compared to the standard battery of psychological tests and the ratings of therapists using the California Q-sort - a Doctoral Thesis, 1993.

Levy, J. - Handwriting posture and cerebral organization: how are they related?; *Psychological Bulletin*, 91, 3, 589-608, 1982.

Lewinson, Thea Stein - Handwriting Analysis in Diagnosis and Treatment of Alcoholism; *Perceptual and Motor Skills*, Vol. 62, Feb. 1986.

Lewinson, T.S. - Contributions to the history of psychology, Naftali Aries Remembered 1911-1990; memories of an esteemed colleague and friend, who contributed extensively to understanding of analysis of handwriting. *Perceptual and Motor Skills*, V0074 4N3, pp 1181-1182, June 1992.

* Lockowandt, Oskar - The problem of the Validation of Graphological Judgements; University of Bielefeld, Germany (undated).

* Lomonaco, Theresa, Ross Harrison, and Felix Klein - Hunter College, City University of New York; Accuracy of matching TAT and graphological personality profiles; *Perceptual and Motor Skills*, 36, 703- 706, 1973.

Luria, A. - Analysis of the writing and drawings of patients with severe brain damage; Higher Cortical Functions in Man, Basic Books, 1980.

Lynch, Brian - Graphology: Towards a Hand-Picked Work Force; Personnel Management, Mar. 1985, v17n3,p. 14-18.

Mack, L. - Hemispheric Specialization for Handwriting of Right-Handers; Brain and Cognition; V0021 N1, pp 80-85, Jan. 1993.

Maeland, A.F. - Handwriting and Perceptual Motor Skills in clumsy, dysgraphic, and normal children; Perceptual and Motor Skills: V0075N3, pp 1207-1217,Dec. 1992.

Montano, Nicholas J. - Neuropsychology of language dysfunctions correlating to features of written language; Alzheimer Disease; neurological disorders; Masters' Thesis

Mullins, J.- A handwriting model of children with learning disabilities; Journal of Learning Disabilities, 5, 306-311, 1972.

Nevo, Baruch - National Institute of Testing & Evaluation, University of Haifa - Graphology Validation Studies in Israel: Summary of 15 years of Activity; In International Association for Applied Psychology, Jerusalem, July, 1986.

* Nevo, Baruch - Yes, graphology can predict occupational success: Rejoinder to Ben Shakhar, Et Al; Perceptual and Motor Skills, 66, 92-94, 1988.

Pearl, R. - The value of handwriting in neurologic examination; The mount Sinai Journal of Medicine, 41, 1, 200-204,1974

Peeples, E. Edward, PhD, University of Northern Colorado - Measurement of Handwriting Factors; Perceptual and Motor Skills, 68; 142, 1989.

Peeples, E. Edward, PhD, University of Northern Colorado - Copied versus free writing, 1993.

Peeples, E. Edward, PhD, University of Northern Colorado - Genetics and handwriting, a study of the handwritings of family members, 1988.

Pritchard, Anita - Reliability of graphological judgments based on different techniques of handwriting analysis; Szondi Test as a diagnostic tool in a clinical setting; Doctoral Dissertation (date unknown)

Sara, C. - Handwriting as a tool in the diagnosis of the hyperactive child. A blind study of the handwritings of 24 children comprising one hyperactive group of 8 and two control groups of X, one group normal and the other slightly retarded. They were analyzed for 17 personality characteristics measured for four degree of intensity...The profiles obtained by graphological analysis match the appropriate clinical profiles. In A. Carmi & S. Schneider (Ed's.),

Experiencing;
Graphology, 1988

Sassoon, R. - Childrens' Handwriting As An Indicator of Stress; International Journal of Psychology; V0027 N3-4, p 440, Jun-Aug 1992.

Satow, Roberta (Brooklyn College) and Jacqueline Rector (New York City). Using Gestalt Graphology to Identify Entrepreneurial Leadership Perceptual and Motor Skills (1995, 81, 263-270); Entrepreneurial leaders are key to economic success in postmodern society. This paper indicates that Gestalt graphologists, using handwriting alone, are able to identify successful entrepreneurs. Handwritings of entrepreneurs with proven success in business were paired with handwritings of a random sample from a national database of American households with telephones. The graphologists were asked to identify the handwriting of the successful entrepreneurs in each of the 40 pairs. The observed frequencies of success for the three graphologists were 31, 34, and 34 out of 40, respectively.

Schwarz, Daniel (graduate student) College of Criminal Justice, New York - A validity study of graphology: Its usefulness in assessing integrity in identifying people prone to committing theft; Master's Thesis 1992.

Smith, Willa, Ed.D - Relationship between handwriting and creativity in 5th grade children; doctoral Dissertation, 1984.
